Il sistema permette di monitorare gli andamenti dell'asta per ogni lotto cliccando sul pulsante "Bidding History".

A Auction TEST ROLLED STEEL (€/TONS)	Q. Search
Image: Second and Second	Search

Quando il campo "Remaining time" diventa rosso, significa che l'asta sta per essere chiusa (periodo calmo).

Opzionale:

Se durante questo periodo un fornitore presenta un'offerta, il sistema dà il via a una proroga (rinnovo) che permette agli altri fornitori di continuare a fare offerte.

> ASTA INGLESE BASATA SULLA GRADUATORIA - 1/2

La posizione del fornitore in merito alla migliore offerta attuale viene indicata secondo una graduatoria basata su un punteggio tecnico. Si tratta di un'asta che fa attribuzioni multiple e non si basa sul prezzo. Ciò permette ai fornitori di gareggiare su tutte le dimensioni critiche per l'acquisitore.

Un'asta olandese è un tipo d'asta in cui l'acquisitore fissa un prezzo di partenza che viene automaticamente aumentato di un valore definito a intervalli temporali prefissati. Questo va avanti fino a quando un partecipante vuole accettare l'importo attuale. Il partecipante vincente paga l'ultimo prezzo annunciato.

> ASTA GIAPPONESE - 1/2 MIGLIOR PREZZO

In un'asta giapponese, il prezzo diminuisce nel corso del tempo; l'asta è caratterizzata dal valore decrescente e dall'intervallo temporale che fissa il ritmo delle diminuzioni. Il prezzo diminuisce automaticamente in base a un intervallo temporale e a un valore decrescente predefiniti. A ogni fase i fornitori possono ritirarsi, ovvero fissare il prezzo corrente come il loro prezzo minimo (la loro migliore offerta).

Con l'impostazione al Miglior Prezzo il fornitore che abbandona per ultimo l'asta vince al prezzo che è stato raggiunto al momento del suo ritiro.
