The lot PC has ended.

На Японском аукционе стоимость снижается со временем; аукцион характеризуется величиной уменьшения, а отрезком времени, который устанавливает шаг снижения. Стоимость снижается автоматически в соответствии с predetermined промежутком времени и снижающейся ценой. Поставщик может отказаться от участия после каждого шага, например, установить текущую стоимость как минимальную (оптимальное предложение).

При схеме лучшей цены, конкурент, оставшийся последним, выигрывает аукцион по цене, достигнутой до его/ее выхода.

You will have to click the "Drop out" button if your price limit is reached and you wish to quit the auction. If you do not drop out, you will win the auction at the price limit of the last bidder, or if need be, at the price reached at the auction's end date.' A red box highlights the 'Participate' button in the dialog. Another red arrow points from the 'Participate' button in the table to the 'End of the auction' setting in the 'LOT SETTINGS' panel, which is set to 'At the best price'.
